• Peperiksaan Menengah Rendah (7A 2B)

1993-1998 : Sekolah Kebangsaan Bandar Pontian, Pontian, Johor
• Ujian Penilaian Sekolah Rendah (5A)

ACADEMIC

2009 : Final Year Thesis
Do research about information and communication and particular interest is a wireless communication system. Wireless networking is used to meet many needs. Perhaps the most common use is to connect laptop users who travel from location to location. Another common use is for mobile networks that connect via satellite. A wireless transmission method is a logical choice to network a LAN segment that must frequently change locations. Using wireless LAN, we have a problem with security, speed, and reliability, in my research we try to minimum this problem.

2006

2004

2003

- TOEIC(English Proficiency Test) 700
- Japanese Language Proficiency Test Level 3
- Sijil Pelajaran Malaysia (SPM)
