**CAREER OBJECTIVE**

To obtain a position as a Manager in the field of project management, construction & structural engineering. Seeking position utilizing my management experience and strong organisational skills. My long term goal is a senior management position in construction management or engineering division in oil and gas industry.

**SUMMARY OF SKILL PROFILE**

Over 20 years of experience in Project Management industry in managing projects execution covering from the initial exposure to manufacturing lines up to the latest EPCC of regassification project of 30inch pipeline over a stretch of 30kms. Am involved in Project and Construction Management related activities for onshore projects from project inception, planning, feasibility study, FEED, tendering, detailed engineering, procurement, construction and up to project completion and commissioning. In addition, my experience also covers cost estimation, cost control and construction planning as well as commercial negotiation and processes related to project management and overall project execution.

Currently, I assume position as a Project Development Manager in Joint Venture Malaysia Sector 4 Division to manage Petronas Carigali Sdn Bhd partners namely Newfield, Petrofac, Exxonmobil and Lundin. Current projects under my direct responsibility are:

1. Cendor Phase 2 Field Development
2. West Desaru Field Development
3. Damar Field NAG Development
4. Telok NAG & TAPIS EOR Development
5. Bertam Field Development

## **DETAILED EXPERIENCE AND WORK**

**Jan 2008 – To Date: Joint Venture Project Development Manager**

**Company: PETRONAS CARIGALI SDN BHD, Head Office – KLCC, Kuala Lumpur**

- Implement development project activities for field development by influencing Petronas partners to develop oil and gas discoveries, ensuring application of optimum technology, managing development risks, and resolving project implementation challenges for timely monetization in achieving Petronas Corporate Agenda target.
- Assess the project expenditure activities by tracking and analyzing the project cost performance, change order and monthly expenditure to alert, minimize and mitigate any potential issues from respective projects.
- Manage, track and analyse project schedule timeline to identify any deviation and to alert and mitigate any potential issues for respective projects.
- Manage and analyse data related to value chain relationship amongst Petronas business units to facilitate integration and synergy towards maximizing overall Petronas value creation.
- Foster relationship with stakeholders, partners and contractors at the appropriate level throughout the project execution period to ensure Petronas interests are safeguarded.
- Develop and manage the overall schedule, work breakdown structure that cover all activities and major milestones with logical sequence to ensure successful project completion for maximum value creations of PCSB's project.
- Manage, assess and analyse the integrated production project timeline, cost and economics to enable early detection of potential issues and opportunities to allow identification of intervention plan to minimize potential economic impact and maximize value creation by ensuring achievement of 1<sup>st</sup> production or startup date of project
- Develop the infrastructure, manage track and analyse the deployment of expertise within development projects in order to ensure resource optimization.
- Analyse the trending of deployment against project performance to set references in developing the strategy for future deployment of expertise towards meeting the business targets.
- Participate in sharing success stories and lesson learnt in the implementation of project management process and identify and propose improvement initiatives towards ensuring continuous improvement.
- Coach and guide staff, conduct periodic performance review, counsel and motivate staff to instill the right mindset, behaviours and values to attain high performance standard.
- Implement and comply to the Codes of Conduct and HSE policies in order to sustain high staff discipline and industrial harmony.
